SUMMARY

DevOps / DevSecOps Engineer with hands-on experience in designing, deploying, and securing cloud-native applications on AWS using Docker and Kubernetes (EKS). Strong exposure to CI/CD automation, infrastructure security, monitoring, and observability using Prometheus and Grafana. Proven ability to build scalable, resilient, and secure microservices architectures with a solid foundation in Linux administration, networking, and security best practices. Trained through CDAC PG-DITISS, with practical project and lab experience aligned to real-world DevOps environments.

SKILLS

DevOps & Cloud

- Docker, Docker Hub
- Jenkins (CI/CD Pipelines)
- Kubernetes (Deployment, Services, Pods - basics)
- AWS: EC2, S3, IAM, VPC, Security Groups

DevSecOps & Security

- PKI Fundamentals
- ISO 27001 (Foundational)
- Snort (IDS)

Networking

- TCP/IP, DNS, DHCP, NAT
- Firewalls, Network Hardening

Operating Systems

- Windows/Linux Administration
 - User & Permission Management
 - Virtual Machine Setup
-

PROJECTS

Kart-Stream – Kubernetes-Based Microservices E-Commerce with Security & Monitoring

Tools: AWS((EKS, EC2, IAM, VPC), Docker, Kubernetes, GitHub, Docker Hub, Prometheus, Grafana, Snort

- Designed and deployed a cloud-native microservices e-commerce application with focus on scalability, security, and observability.
 - Deployed and managed 10+ containerized microservices on a manually configured AWS EKS cluster.
 - Implemented Docker-based CI/CD-ready workflows using version control via GitHub and images hosted on Docker Hub.
 - Integrated Prometheus for metrics collection and Grafana for real-time performance monitoring and dashboards.
 - Configured Snort IDS on EC2 instances for intrusion detection and alerting.
 - Applied AWS security best practices including VPC isolation, IAM roles, and security groups.
 - Gained strong hands-on experience in DevOps, Kubernetes orchestration, cloud security, and monitoring.
-

EDUCATION

Post Graduate Diploma in IT Infrastructure, System and Security (PG-DITISS) Feb 2025 - Aug 2025

CDAC | Sunbeam Institute, Pune

Key Areas:

Networking, Cybersecurity, Linux & Windows Administration, Cloud Computing, DevOps, IT Infrastructure Management

Bachelor of Engineering – Computer Science Engineering

June 2018 - May 2022

Dr. D. Y. Patil Institute of Technology, Pune

CGPA: 8.53
